

Justin Fox has 42 years of international transportation and industrial management experience. He has worked on more than 100 rail planning projects since 1997, when he joined Wilbur Smith Associates, a transportation engineering and planning consultancy. Previously Mr. Fox served for eight years at the former Southern Pacific in a variety of management capacities, including director of strategic planning. Currently, Mr. Fox works with private and public sector clients on rail economics and operational analyses. He specializes in the development of strategic plans for public agencies sponsoring rail passenger services. He is the author of numerous articles and treatises, including National Cooperative Highway Research Program (NCHRP) Report 773 on rail line capacity analysis techniques for shared-use corridors.
